1. Please explain how you would create a QA pipeline from scratch for Google Maps.

   - First I understand Test Cases
   - Check Manually Test Cases Using Mouse
   - Create a New Cypress Project in Visual Studio Code
   - Write Script related Test Cases
   - Automate all Test Cases

2. Please explain how you would implement automated tests for the below scenario.

   - I automated "Zoom in/Zoom out" and "Mouse click 'Marina Bay Sands Singapore' From the Map"
   - In Zoom in/Zoom out Test Case , I used mouse "trigger wheel" method
   - In Mouse click 'Marina Bay Sands Singapore , I used "trigger mouseover" method
   - I tried to automate 'Click and Drag to Pan the Map ' Test Case. I am getting a different location pointer in Result but not getting the Expected Result.
